

Our home is a haven where we can relax and enjoy our family after a busy day at work. It has been even better since we have not been receiving any annoying calls from telemarketers which take away precious time from those we love. We believe it is important that the FCC does not implement any proposal that would change Indiana's Telephone Privacy law. We pay a monthly fee to have telephone service for our own personal use not to open our home to unsolicited calls. Please help us keep it that way...Paul & Arleen Mullikin
